SPONSORSHIP LEVELS

Dear Sponsors and Exhibitors,

We are excited to announce the 16th annual meeting of **Behavior, Biology, and Chemistry: Translational Research in Substance Use Disorders (BBC)** will be held in-person on March 22 - 24, 2024 at the Embassy Suites by Hilton Landmark in San Antonio, TX. Explore networking opportunities across various disciplines and engage in abundant learning experiences through an exceptional lineup of invited lectures, all converging around the central theme, **"Don't sleep on Substance Use Disorders."**

The primary goals of the BBC Meeting are to:

- Foster transdisciplinary interactions among clinicians, chemists, pharmacologists, and others to explore new and innovative approaches for treating substance use disorders.
- Provide a low-threshold venue for students and other trainees (especially those from underrepresented populations) to present their data and interact with "movers and shakers" in the substance use disorder field.

Please consider becoming a 2024 Sponsor/Exhibitor. Visit <https://ww2.uthscsa.edu/artt/BBC/index.asp> to learn more about the meeting. We hope you consider making a financial contribution to support this great event that brings together a broad range of professions to collaborate and discover new treatments for substance use disorders.

With your support, we will be able to:

- Provide full travel stipends and waive registration fees for students from around the country to attend and present their data at the meeting (more than 60 young scientists received travel fellowships last year).
- Fund travel grants for our outstanding slate of invited lecturers.
- Underwrite other costs associated with the meeting.

We look forward to seeing you this year at the 16th annual BBC Meeting and thank you for your consideration to support this important event. For any questions, please contact bbc@uthscsa.edu.

Sincerely,

Charles P France, PhD

Robert A Welch Distinguished University Chair in Chemistry
