

UT HEALTH SAN ANTONIO NIDA T32 PREDOCTORAL TRAINING IN SUBSTANCE USE DISORDERS

The NIDA T32 Training in Substance Use Disorders Program is seeking highly motivated predoctoral applicants. The Program is in its 15th year and supports both predoctoral and postdoctoral trainees. Trainees will benefit from the camaraderie and expertise of fellow trainees and faculty.

ARTT CENTER OF EXCELLENCE

The Addiction, Research, Treatment, and Training (ARTT) Center of Excellence comprises a diverse group of scientists, clinicians, and educators who are developing novel behavioral and pharmacological approaches to understand and treat substance use disorders. Our faculty, trainees, and students are dedicated to making significant advances that will address real-world problems.

HOW TO APPLY

Applications are due by **1 June 2026** for appointment beginning on **1 July 2026**. For full application details, please visit:
<https://ww2.uthscsa.edu/artt/t32/PredocApply.asp>
